DR RACING KART
J90
30 mm / 32 mm

Il J90, l'ultimo nato in casa DR nasce dallo sviluppo del suo predecessore J90 rivisitato completamente nelle sue forme. La scocca è in tubi al cromo molibdeno da Ø32mm per la traversa anteriore, mentre il resto dei tubi da Ø30mm, regolabile in altezza sia anteriormente che posteriormente. La rigidità può essere variata con l'impiego delle apposite barre di torsione ed infine, grazie al sistema Sniper, si può regolare sia il camber che caster. Sarà equipaggiato con nuove carenature modello KG508 e carenatura posteriore KG C3 e con nuovi kit adesivi. Si può scegliere, tra impianto freno VEN11 categoria Direct Drive e VEN11 categoria KZ Shifter, o con l'innovativo impianto frenante VEN13 categoria Direct Drive e VEN13 categoria KZ Shifter. La novità più rilevante riguarda la pompa, che prevede un innovativo sistema per modulare la frenata denominato ABA (adaptive brake assistant). Attraverso un regolatore, sarà infatti possibile tarare la pompa in modo che un sistema interno gestisca la forza frenante, evitando il bloccaggio delle gomme. Inoltre grazie agli appositi supporti cuscinetto sarà possibile variare il passo.

J90 is the last born at DR from the development of its preceding J90 totally revisited in its shape. The frame is in NiCrMo Ø32mm tubes for the front crossbar, while for the rest there are Ø30mm tubes which are adjustable in height both front and rear. The rigidity may be varied through specific torsion bars and, lastly, thanks to the Sniper system, both the camber and the caster can be adjusted; the chassis will be equipped with new model KG508 bodywork, a KG C3 rear bodywork and a new adhesive kit. It will be possible to choose between the VEN11 DD brake system for Direct Drive categories and the VEN11 KZ for the Shifter/KZ categories and the innovative VEN13 KZ for the Shifter/KZ categories; the most outstanding innovation regards the pump which foresees an innovative system capable of modulating the brake efficiency denominated ABA (adaptive brake assistant). Through a regulator it will be possible to adjust the pump so that an internal system manages the braking force in order to avoid blockage of the tires. Furthermore, thanks to specific axis flanges, it will be possible to variate the wheel base.

TELAIO - CHASSIS
DR RACING KART
M99
30 mm / 32 mm

Il nuovo telaio M99, recentemente omologato, completa la gamma dei telai racing della DR. La scocca è in tubi d'acciaio al cromo molibdeno da ø30mm per i longheroni e ø32mm per le traverse e può subire un gran numero di regolazioni. Si possono variare, la rigidità con l'impiego delle apposite barre di torsione e l'altezza che può essere regolata sia anteriormente che posteriormente. Il range di regolazione camber e caster è vasto grazie al sistema di regolazione Sniper. Sarà equipaggiato con nuove carenature modello KG508 e carenatura posteriore KG C3 e con nuovi kit adesivi.Si può scegliere, tra impianto freno VEN11 categoria Direct Drive e VEN11 categoria KZ Shifter, o con l'innovativo impianto frenante VEN13 categoria Direct Drive e VEN13 categoria KZ Shifter. La novità più rilevate riguarda la pompa, che prevede un innovativo sistema per modulare la frenata denominato ABA (adaptive brake assistant). Attraverso un regolatore, sarà infatti possibile tarare la pompa in modo che un sistema interno gestisca la forza frenante, evitando il bloccaggio delle gomme. Inoltre grazie agli appositi supporti cuscinetto sarà possibile variare il passo.

The new recently licensed M99 chassis completes the range of the DR racing chassis. The frame is in ø30mm NiCrMo tubes for the longerons and in ø32mm NiCrMo tubes for the cross-bars, plus it allows a great number of regulations. Both rigidity and height can be varied; the first through the use of specific torsion bars and the latter can be regulated both front and rear. The range for both camber and caster regulations is quite wide, thanks to the Sniper regulation system. The chassis will be equipped with new model KG508 bodyworks, a rear KG C3 bodywork and a new adhesives kit.It is possible to choose the VEN11 DD brake system for the Direct Drive categories and the VEN11 KZ for the Shifter/KZ categories, or the VEN13 DD innovative brake system for Direct Drive categories and the VEN13 KZ for the Shifter/KZ categories; the most outstanding feature regards the pump, which presents an innovative system capable of modulating the braking action denominated ABA (adaptive brake assistant). By means of a regulator, it will be possible to adjust the pump allowing an internal system to manage the braking force, avoiding the blockage of the tires. Furthermore, thanks to specific axis flanges, it will be possible to variate the wheel base.

M92
30 mm

Il nuovo telaio M92 nasce dallo sviluppo del suo predecessore M92-15 rivisitato completamente nelle sue forme. La scocca è in tubi al cromo molibdeno da Ø32mm regolabile in altezza sia anteriormente che posteriormente. La rigidità può essere variata con l'impiego delle apposite barre di torsione ed infine, grazie al sistema Sniper, si può regolare sia il camber che caster. Sarà equipaggiato con nuove carenature modello KG508 e carenatura posteriore KG C3 e con nuovi kit adesivi.
Si può scegliere, tra impianto freno VEN11 categoria Direct Drive e VEN11 categoria KZ Shifter, o con l'innovativo impianto frenante VEN13 categoria Direct Drive e VEN13 categoria KZ Shifter. La novità più rilevante riguarda la pompa, che prevede un innovativo sistema per modulare la frenata denominato ABA (adaptive brake assistant). Attraverso un regolatore, sarà infatti possibile tarare la pompa in modo che un sistema interno gestisca la forza frenante, evitando il bloccaggio delle gomme.
Inoltre grazie agli appositi supporti cuscinetto sarà possibile variare il passo.

The new M92 is the result of the development of its predecessor M92-15, totally re-elaborated in its shape. The frame is in NiCrMo Ø32mm, adjustable in height both front and rear. The rigidity may be varied through the use of specific torsion bars and, thanks to the Sniper system, both the camber and the caster can be regulated. It will be equipped with new model KG508 bodyworks, rear KG C3 bodywork and new adhesive kits.
It is possible to choose the VEN11 DD brake system for the Direct Drive categories and the VEN11 KZ for the Shifter/KZ categories, or the VEN13 DD innovative brake system for Direct Drive categories and the VEN13 KZ for the Shifter/KZ categories; the most outstanding feature regards the pump, which presents an innovative system capable of modulating the braking action denominated ABA (adaptive brake assistant). By means of a regulator, it will be possible to adjust the pump allowing an internal system to manage the braking force, avoiding the blockage of the tires.
Furthermore, thanks to specific axis flanges, it will be possible to variate the wheel base.
